

Client: City of Guben
Location: Potsdam, Guben
Time frame: 01/2020 – 04/2020
Name of project: Feasibility Study for a Rail Terminal (Rail-Port) within the Industrial Zone Guben South

Main project features:

- Analysis of existing transport infrastructure and connectivity
- Design and execution of a market survey to determine the current and future transport volume of local and regional companies potentially relevant for a rail terminal (by questionnaire and/or interviews in person)
- Determination of operational aspects as well as cost and revenue factors including applicable funding programmes (public support grants)
- Development of five technical options for the rail terminal including layout plans, description of technical features and investment costs as well as subsequent selection of the preferred option
- Financial analysis of the preferred option
- Recommendation
- Preparation of a presentation for a potential investor describing different transport options from/to Guben (road, rail, intermodal)

Subjects:

Logistics, Infrastructure, Feasibility Study
