

Client: Ministry of Transport of the Hashemite Kingdom of Jordan

Location: Amman, Jordan

Time frame: 09/2010 to 03/2013

Name of project: Technical assistance to the Ministry of Transport for the implementation of the transport and the trade facilitation programme

Main project features:

- Assistance in organisational structure development and in clarification of mandates for each department and sector responsibilities
- Advice on strategy and policy towards the development of the transport sector in Jordan and its integration into regional networks
- Support the various studies on regulatory requirements and ensuring consistency in approach
- Identifying the training needs of stakeholders
- Design and implementation of a training programme on the subject of transport planning, budgeting and investment assessment of transport infrastructure projects (cost-benefit analysis), organisations and intermodal logistics, organising study trips to Germany, Switzerland and the Netherlands
- Development of a long-term, strategic advanced training program for civil servants, executives and specialists of the MOT, the NCTTF and the TTF
- Training of MoT, NCTTF members and other stakeholders in promoting trade and transport, logistics and infrastructure as well as the creation of an institutional framework for continuous improvement and implementation
- Advice on the further development of the MoT and the related offices; further development of the national transport strategy for the period 2009-2011 and the long-term strategy
- Assessment and recommendations on the legal framework and the regulations in the transport and trade sector.

In cooperation with Dornier Consulting / Louis Berger SAS / Comito & Associati S.r.l. / Philadelphia Consulting Group Ltd.

Subject: Intermodal Transport
